

ALI MOHAMED

DevOps Engineer

Nasr City, Cairo, Egypt | 01121183571 | alimohamed22233aaa@gmail.com | [linkedin.com/in/ali-mohamed-b99b20326](https://www.linkedin.com/in/ali-mohamed-b99b20326)

CAREER OBJECTIVE

Telecommunications Engineering student with a strong passion for Cloud Computing and DevOps. Equipped with solid foundations in enterprise networking and Linux administration, complemented by hands-on experience architecting AWS cloud environments, containerizing applications with Docker, and automating infrastructure through Terraform. Eager to join a dynamic tech environment that fosters continuous learning and the development of scalable, reliable cloud solutions.

EDUCATION

Bachelor's Degree in Electronics & Communications Engineering

September 2022 - September 2027

Faculty of Engineering, Zagazig University | Grade: Very Good

PROFESSIONAL TRAINING

DevOps, Digital Egypt Pioneers Initiative (DEPI) - Remote

July 2026 - Present

- Building foundational skills in Linux system administration, including command-line operations, file systems, and shell scripting.
- Studying cloud computing fundamentals and their role in modern DevOps workflows and infrastructure management.

Cloud Services Management and Operation, NTI - Benha, Egypt

January 2026 - March 2026

- Configured and managed foundational AWS cloud services, including compute (EC2), storage (S3), and networking (VPC).
- Implemented cloud security best practices using Identity and Access Management (IAM) and security groups.
- Monitored cloud architecture performance and applied resource management techniques to ensure high availability.

CCNA v7, National Telecommunication Institute (NTI) - Remote

October 2025 - December 2025

- Configured, verified, and troubleshoot Cisco routers and switches in enterprise network topologies.
- Implemented core networking concepts including IPv4/IPv6 addressing, subnetting, VLANs, and Spanning Tree Protocol (STP).
- Deployed routing protocols (e.g., OSPF) and enhanced network security using Access Control Lists (ACLs).

HCIA Datacom v1, Huawei ICT Academy - Egypt, Remote

September 2025 - October 2025

- Gained hands-on experience in configuring Huawei enterprise network devices using the eNSP simulator.
- Deployed and managed static routing and dynamic routing protocols to optimize data transmission.
- Mastered network fundamentals, Ethernet switching principles, and basic network security configurations.

Cloud Essentials, National Telecommunication Institute (NTI) - Remote

July 2025 - July 2025

- Studied the core concepts of Cloud Computing models (IaaS, PaaS, SaaS) and deployment strategies.
- Explored data center virtualization technologies, hypervisors, and storage virtualization architectures.

SKILLS & LANGUAGES

Cloud & Infrastructure: AWS (Cloud Practitioner, Solutions Architect Associate), Huawei Cloud, Terraform, Linux

DevOps & Tools: Docker, CI/CD (GitHub Actions), Git, GitHub

Networking: Cisco CCNA, Huawei HCIA Datacom

Programming: Python, C

Soft Skills: Teamwork, Time Management, Problem-Solving, Adaptability

Languages: Arabic (Native), English (Fluent)

PROJECTS

Multi-Site Enterprise Network Design & Implementation

- Designed and implemented a secure multi-site network architecture with segmented traffic using VLANs.
- Configured and managed essential network services, including DHCP, DNS, and Web Servers, to ensure seamless resource availability.
- Established reliable inter-site connectivity using static routing and optimized network performance.

AWS Solutions Architecture Capstone (AWS Academy)

Technologies: AWS (EC2, ALB, Auto Scaling, RDS MySQL, Secrets Manager, VPC), Linux

- Architected and deployed a highly available, auto-scaling web application across multiple Availability Zones using Application Load Balancers (ALB) and Auto Scaling Groups (ASG).
- Provisioned and migrated data to a secure Amazon RDS MySQL database hosted in private subnets, ensuring fault tolerance.
- Enhanced system security by implementing strict Security Group rules and utilizing AWS Secrets Manager to protect database credentials.

Automated 3-Tier Cloud Infrastructure

- Architected and deployed a scalable 3-tier web application (Frontend, Backend, and Database layers).
- Leveraged Terraform (Infrastructure as Code) to automate the provisioning and management of the entire cloud environment.
- Implemented best practices for application hosting, ensuring secure data flow and efficient communication between architectural tiers.

CERTIFICATES

Huawei Certified Cloud Developer Associate - Tech Essentials (HCCDA), Huawei Cloud

September 2025

- Validated foundational knowledge of Huawei Cloud services, including cloud-native architecture, computing, storage, networking, and security.
- Demonstrated hands-on ability to utilize cloud databases and developer tools to build, deploy, and manage cloud applications.

AWS Certified Cloud Practitioner, Amazon Web Services (AWS)

- Validated foundational understanding of AWS Cloud concepts, core services, security, architecture, pricing, and support models.
- Demonstrated knowledge of the AWS shared responsibility model, IAM best practices, and key compute, storage, database, and networking services (EC2, S3, VPC, RDS).
- Gained proficiency in AWS pricing models, billing tools, and cost-management best practices for optimizing cloud spend.
